

THE BETTER BUGTRAP FOR PLANTS

The Better Bugtrap™ for Plants is the simple way to eliminate flying and crawling plant pests in the home and garden. These specially designed traps control infestation and break the breeding cycle. The attractive bright butterfly shaped trap can be inserted into potted plants, gardens or hung in trees, greenhouses and other areas affected by aphids, fruit or white flies, leaf miner, gnats, mosquito and more. The catch on contact adhesive is free of harmful chemicals which makes "The Better Bugtrap for Plants" the organic choice for effective trapping and removal of plant pests inside and out! 10 Traps and hang ties included for multiple locations—dispose every three months or when butterfly surface is full.

Effective on:

...and MORE

Remove protective film from butterfly shaped glue traps.

Separate traps slowly, be careful not to touch the glue surface by hand.

Insert pointed end of glue trap into soil area of plant/garden or hang trap with wire ties provided.

Once the trap is full, wrap it in newspaper and dispose. Replace traps every 3 months or when full.

GOTCHA!
